

DEAR
Switzerland

"Thanks" to Covid-19 | Learned that I
want to focus on those few people who
truly matter to me — less is more
when it comes to REAL friendship.

And I truly want to continue take
away food, in combination with a drink
to be enjoyed somewhere outside. As
well as PATIENCE — I feel like we
all could use a bit more of it in our
everyday lives, privately as work related.

And I want to let the future
Switzerland know that we can stand
together in solidarity if needed but
should not forget to also do so if there
is no crisis pushing the break button.
